

Created a set of nested categories in Modeler for test purposes. Made a TAP and opened the same data set in STAfS using the TAP. Note the nested categories each become a category themselves, and the top-most category now contains zero responses.

Category	Descriptors	Docs
Uncategorized	-	1
No concepts extracted	-	0
acidosis	4	608
acids general	41	616
amount	5	152
ATP	2	24
bases general	17	582
blood	66	574
blood ph	3	409
body	37	524
buffers	2	644
carbon dioxide	25	639
carbonate forms	104	640
bicarbonate	39	636
carbonate ion	7	38
carbonate		33
carbonate concentration		1
carbonate equilibrium		1
carbonate ions		2
carbonate reaction to shift		1
carbonate system		5
carbonate system doesn't		1
carbonic acid	58	606
cell	17	216
cellular metabolic	8	10
chemical compounds	15	419
chemical elements	1	0
