TAFS 4.0.1. Null error: internal error during term extraction. Error code: -1073741819.

Technote (troubleshooting)

Problem(Abstract)

I am trying to perform an extraction in Text Analytics for Surveys 4.0.1 and I'm getting the following error and I am unable to perform an extraction.

Null: Detailed error: Internal error during term extraction. error -1073741819

Resolving the problem

This problem has been reported to SPSS Development and is scheduled to be resolved in a future patch. IBM SPSS would like to apologize for any inconvenience caused.

As a workaround, in the C:\Program Files\IBM\SPSS\Text Analytics for Surveys\4\lqmine\default_spssml.xml file, add the following section and save the change:

```
<param name="NbThreads">
  <val v="1"/>
</param>
```

Add it right before the ParseSolution section:
for example:

```
...
  <param name="SaveMatchInRepository">
    <val v="1"/>
  </param>

  <param name="NbThreads">
    <val v="1"/>
  </param>

  <param name="ParseSolution">
```
